5. Canvieu les XX que hi ha a [fltsim.XX] pel número correlatiu següent al [fltsim.XX] anterior. Atenció perquè hi ha dos [fltsim.XX] corresponents a la visió del pilot i del copilot-
6. En la línia "atc\_id=" podeu posar el vostre indicatiu (en el meu cas és CAT012) que és el que apareix en el camp "Nombre de ATC" en la pantalla "Seleccionar Avión". També podeu fer-ho cada cop que seleccioneu l'avió a l'enegar el simulador.
7. Salveu el fitxer i engegueu el FS2004.

## Fokker F70CT – Digital Aviation

### ENGLISH:

5. Change the XX in [fltsim.XX] for the next number found in your last [fltsim.XX] group of the aircraft.cfg file. Be careful as there are two [fltsim.XX] sections, one for the pilot and another for the copilot.
6. Under line "atc\_id=" you may type your callsign (in my case it is CAT012) which will be displayed under "ATC name" in the "Select aircraft" screen. You may also change it each time you run the simulator and when selecting an aircraft.
7. Save the file and run FS2004.
