2. Copiar la carpeta "texture.cat\_2010" dins del directori del MAAM Douglas DC-3 (MAAM-SIM DC-3 Passenger) que ja haureu instal·lat al vostre FS2004.
3. Obrir el fitxer aircraft.cfg del vostre MAAM Douglas DC-3 Passenger amb l'editor que preferiu (Notepad o Notepad++, per exemple).
4. Copieu el text que teniu tot seguit entre les dues ratlles d'asteriscs (sense els asteriscs, naturalment) i enganxeu-lo a continuació del darrer grup [fltsim.XX] que hi hagi en el fitxer aircraft.cfg.

5. Canvieu les XX i YY que hi ha a [fltsim.XX] i [fltsim.YY] pel número correlatiu següent al [fltsim.XX] anterior. Compte que per cada nova textura d'aquest avió hi ha dues seccions [fltsim.XX] i [fltsim.YY] que cal també numerar correlativament com si fossin textures diferents.
6. En la línia "atc\_id=" podeu posar el vostre indicatiu (en el meu cas és CAT012) que és el que apareix en el camp "Nombre de ATC" en la pantalla "Seleccionar Avión". També podeu fer-ho cada cop que seleccioneu l'avió a l'enegar el simulador.
7. Salveu el fitxer i engegueu el FS2004.

### **AGRAÏMENTS:**

A totes les persones que de forma desinteressada dediquen part del seu temps en desenvolupar els meravellosos afegits al simulador base. En aquest cas, a Mark "Dark Moment" Beaumont per les seves plantilles gratuïtes.

Agraïment especial mereix Leen de Jager, home de gran paciència i virtuts de mestre, que m'ha dedicat un bon nombre d'hores per ensenyar-me a fer millor aquesta feina de repintar avions. Moltes gràcies Leen !!

## MAAM Douglas DC-3 Passenger

### ENGLISH:

Textures version 2010 for the MAAM Douglas DC-3 Passenger of the Línies Aèries virtuals dels Països Catalans (Catalonian Airlines - CAT) (<http://www.catalonian-airlines.cat>) for FS2004.

In the zip file you have downloaded you will find this document you are now reading and a folder called "texture.cat\_2010".

### INSTALLATION:

1. The base package of the MAAM Douglas DC-3 must be already installed in your FS2004. You may download this base package at the web site of Mid Atlantic Air Museum (<http://www.maam.org/>).
2. Copy the folder "texture.cat\_2010" into the folder of the MAAM Douglas DC-3 Passenger (MAAM-SIM DC-3 Passenger) which you should have already installed.
3. Open the aircraft.cfg file of your MAAM Douglas DC-3 Passenger with your preferred editor (Notepad or Notepad++, for example).
4. Copy the text between the asterisk lines that you can find after this paragraph (without including the asterisks, of course) and paste it after the last [fltsim.XX] group in your aircraft.cfg file.

5. Change the XX in [fltsim.XX] and [fltsim.YY] for the next number found in your last [fltsim.XX] group of the aircraft.cfg file. Note that this aircraft has two [fltsim.XX] and [fltsim.YY] sections for each texture file and both should be numbered sequentially to work properly.
6. Under line "atc\_id=" you may type your callsign (in my case it is CAT012) which will be displayed under "ATC name" in the "Select aircraft" screen. You may also change it each time you run the simulator and when selecting an aircraft.
7. Save the file and run FS2004.

### **ACKNOWLEDGEMENTS:**

To all these people that invest part of their time to develop such wonderful add-ons for the base simulator for free. In this case, we are especially grateful to Mark "Dark Moment" Beaumont for his freeware repaint templates.

I am especially grateful to Leen de Jager, a very patient man with huge teacher virtues. He has dedicated a large number of hours of his time to teach me on how to do this task of aircraft repainting much better than when I started. A big THANK Leen !!
